

Sept.28, 2006

Dear Almena,

I must tell you just how very excited and pleased I am that our school purchased the Almena Method Typing Program. The unique and innovative method you developed is awesome and so easy. As promised, the students did in fact, learn and memorize the computer keyboard in 20 min! It's unbelievable! We pre and post tested the students and the comparison of results were simply amazing.

The training and practice provided by your program, is easy, effortless and excellent. Your method has allowed our students to meet with great success.

I have worked with many keyboard programs, as a teacher, but none that have provided such rapid and lasting results as yours. The students actually ask to practice typing (almost unheard of) as they are instantly successful. From the very first lesson, students are typing intelligent and purposeful sentences, rather than a series of meaningless and innocuous letters combined together. WOW!

Thank you for creating this incredible program! You are a genius!

Sincerely,

Lisa Friedberg
teacher
